

CREATE YOUR OWN PERFECT GROWING ENVIRONMENT

Start growing your own vegetables, flowers and herbs 365 days a year. Now you can control what you are eating and feeding your family no matter what climate you live in. Produce organic vegetables and herbs with no pesticides or chemicals. With Eden Growrooms, you are in control.

EDEN GROWROOMS

Eden Growrooms are highly insulated, environmental enclosures specifically designed to allow users to have complete control of their growing environment. Eden provides the enclosed shelter which controls the growing environment and protects plants from the outside atmosphere. Add grow lights, shelving, a watering system and air conditioning/heat to provide the perfect growing environment for plants.

Regardless of the weather outside, inside an Eden grow room can be any environment needed for plant growth. No need to worry about plants trying to grow in climates that are too hot or too cold. Control your plants' environment 365 days a year, 24 hours a day!

CUSTOM BUILDS

Custom units are available upon request **at no extra cost**. An insulated floor can be provided for more energy efficiency for indoor or outdoor environments. Eden Growrooms have the ability to be easily expanded or relocated in the future by simply unlocking the panels. Once designed to specified needs, units can optimize plant production and quality of produce.

Optional shelving, floor and entry port is available upon request. Our optional coated shelving system is designed to deal with the harsh conditions experienced in a growing environment.

Eden Growrooms manufacture panels that utilize a cam-action locking device used to connect the panels together for simple and easy set up.

SPECIFICATIONS

Eden Growrooms are constructed with 4" high density foam insulation laminated between two sheets of painted galvanized 26 gauge steel creating modular insulated panels. Each unit comes with tongue and groove edged panels that are equipped with cam-action locking devices that seal tightly to create an enclosed environment. Each standard unit includes an insulated entrance door already installed for easy installation. This design, with its high R-value and gasket construction allows for many years of air tight and water resistant performance.

OUR SERVICE COMMITMENT

At Eden Growrooms, our goal is to develop lasting relationships with our customers, beginning with the very first telephone call. We strive to provide the best in sales and service, from quote to product delivery, with the emphasis on meeting our customers' needs better than anyone else. To help ensure our customers complete satisfaction, our customer service representatives are here to address any specific concerns which may arise following product shipment.
